

Einfeldträger vs. Durchlaufträger (3-12m)

—●— Solid slab, single-axis load-bearing,
continuous (standard superstructure)

- -●- - Solid slab, single-axis load-bearing,
continuous (standard superstructure + filling)

—●— Solid slab, single-axis load-bearing,
simply supported (standard superstructure)

- -●- - Solid slab, single-axis load-bearing,
simply supported (standard superstructure + filling)

—○— Ribbed plate, single-axis load-bearing,
simply supported (standard superstructure)

- -○- - Ribbed plate, single-axis load-bearing,
simply supported (standard superstructure + filling)
